RE: *Questar Gas asking for no public comments*

Dear Chairman Boyer:

I'm writing you to let you know how upset I am about Questar Gas telling the Public Service Commission that the public should be limited in our ability to comment on items before the commission. THIS IS OUTRAGEOUS. I don't care if it takes an extra 2 hours to hear all the comments the public may have regarding a rate increase or anything else that Questar (or any other regulated utility) may be asking for from the Commission. We are held hostage by this monopoly and we damn well have the right to comment on what they want to do with our money. After all we paid for their infrastructure that they are profiting from.

Sincerely,

J.R. Ellingson, III
